Students from Oskaloosa High School's Project Based Work Experience class provided a presentation entitled "Future Ready Oskaloosa," focused on electric vehicles (EVs) and how our community can plan and prepare for them. The students utilized process improvement tools, beginning with a 5 Why analysis, to help develop their problem statement and work through different tools to develop their solutions. This project was a task partnership between the city and Oskaloosa High School for the Plan Osky Comprehensive Plan project and concepts will be incorporated into the new Comprehensive Plan.

Following the presentation, Council and staff engaged in a question-and-answer discussion with the students.

Meeting adjourned at 2:40 p.m.
